Novosibirsk State Technical University

June 11, 2019

The team of teacher and research staff – Profs. Evgeny Basynya, Dmitry Khudiakov, Maxim Bakaev and Ilia Dubkov (NSTU), participated in mobility to universities in Thessaloniki and Sofia, in accordance with the work plan. During the visits, the qualifications of the participants were improved and a number of meetings were held at which important decisions were made.

In particular, a series of reports on the concepts of the technologies of the Internet of Things and the Smart City, as well as the smart home at universities in Greece and Bulgaria and in scientific and research centers, have been heard.

On June 11, 2019 Profs. Evgeny Basynya and Dmitry Khudiakov held the cascade training for the academic staff sharing the results of visit to Alexander Technological Educational Institute of Thessaloniki (Greece) and Technical University of Sofia (Bulgaria). They shared the information about the visit, training seminars and discussions in IT company OTS (Open Technology Services, Thessaloniki) about Smart City's information systems and sensors; visiting laboratories, training seminars and discussions in International Hellenic University (IHU) about data mining for Smart Cities and it's applications; visiting laboratories, training seminars and discussions at Centre for Research and Technology-Hellas (CERTH) about innovative transport services, data analytics, transport modelling supporting smart cities; information about visiting laboratories, training seminars and discussions in Technical University (Sofia), about Smart City's infrastructure, technology, data and strategy; about visiting laboratories in Sofia Tech Park.

June 11, 2019

Training conducted by:

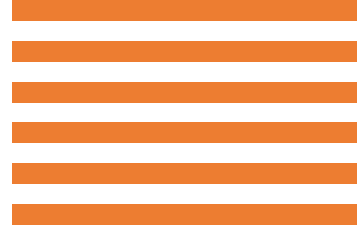

Evgeny Aleksandrovich Basynga - Ph.D. Assistant Professor

Dmitry Sergeevich Khudiakov - Ph.D. Assistant Professor

List of participants:

- Vadim Arkadyevich Zhmud - Doctor of Technical Sciences, Associate Professor, Head Of Chair
- Galina Alexandrovna Frantsuzova - Doctor of Technical Sciences, Associate Professor, Professor
- Evgeniya Leonidovna Veretelnikova - Ph.D. Assistant Professor
- Nataya Petrovna Makarova – Engineer, Automation Chair
- Andrey Vasilyevich Gunko - Ph.D. Assistant Professor
- Denis Nikolaevich Katasonov - Ph.D. Senior Lecturer
- Oleg Petrovich Rusakov - Senior Lecturer
- Galina Vladimirovna Sablina - Ph.D. Assistant Professor
- Valeriy Dmitrievich Yurkevich - Doctor Of Technical Sciences, Professor Professor

Tutkysbayeva Sh.-conducted training on the implementation of the practical part in the process of studying the discipline Data mining, for example, about the program Weka. This program is a set of visualization tools and algorithms for data mining and solving forecasting problems, along with a graphical user shell for accessing them. Weka - allows you to perform data analysis tasks such as data preparation (preprocessing), feature selection (selection feature), clustering, classification, regression analysis and visualization of results.

In addition, all the advantages of the program were considered, namely that this program can be supplemented using the JAVA programming language. Examples of data visualization in the form of diagrams were shown.

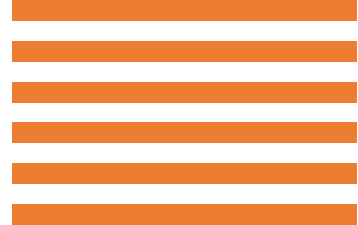

During their studies at the university in Greece, scientists showed software to test traffic in the city.

AkhayevaZh. shared knowledge gained at the Technical University of Sofia (Bulgaria). She spoke in detail about the knowledge, which gained at the university. She held a practical lesson. The teachers listened with great interest and asked project participants their questions. In general, the training was successful, many questions were introductory.
