## Saratov State Technical University

On November 26, 2019 a cascade training for the academic staff of the Institute of Applied IT & Communications was held for sharing the results of desk and field studies in the frames of the project:

- Prof. Olga Dolinina spoke about the distant learning system of Chemnitz University of Technology (TUC), which she has visited, while Dr. Svetlana Kumova has presented their e-learning platform OPAL and the system of online assessment ONYX . The professors shared their impressions and experience of working in these systems, and information received during the training at TUC.
- Prof. Olga Toropova and Alexey Kuzmin shared their experience of visiting Riga Technical University, the information they have got at master class in virtual laboratories applications. The student studies and agreements were discussed, as well as double degree program perspectives.
